

Security Behaviour and Culture Suite

Train. Test. Measure. Improve.

A Unified Platform for Managing Human Cyber Risk at Scale

SucceedLEARN's Security Behaviour & Culture Suite (SBCS) is a comprehensive platform designed to help organisations that reduce phishing risk, strengthen compliance, and create a lasting culture of security, by combining awareness training, phishing simulations, microlearning, gamified engagement, analytics, and enterprise integrations in one integrated platform.

What SBCS Delivers

- ✓ Reduced phishing susceptibility
- ✓ Improved compliance readiness
- ✓ Strengthened security culture
- ✓ Measures behavioural improvement

**Enterprise-Ready. Behaviour-Driven.
Result-Oriented.**

Proven Results

1000+

Everything Needed to Drive Security Behaviour Change

SBCS brings together all the capabilities required to build, sustain, and measure security culture in one unified platform.

S-Aware - Awareness Training

Role-based, interactive training covering cybersecurity, privacy, and compliance topics.

S-Phish - Phishing Simulations

Realistic phishing campaigns to test behaviour and identify areas of risk.

S-Bytes - Microlearning

Short, focused lessons delivered in the flow of work to reinforce key messages.

S-Play - Gamified Engagement

Challenges, quizzes, leaderboards, and rewards that increase participation and retention.

S-Signs - Visual Campaigns

Posters, infographics, and communication assets that keep awareness visible.

S-Metrics - Analytics & Reporting

Dashboards, completion tracking, phishing metrics, and behavioural insights.

S-Sync - Integrations & Automation

Single sign-on, user provisioning, APIs, and enterprise connectivity.

Additional Capabilities

- ✓ Assessments and certifications
- ✓ Automated reminders and enrolments
- ✓ Multi-language support
- ✓ Role-based learning paths
- ✓ White-labelling and branding
- ✓ SCORM delivery
- ✓ Department and region reporting

**One platform. Continuous engagement.
Measurable outcomes.**

Designed for Continuous Reinforcement

SBCS follows a structured behavioural improvement cycle that turns awareness into lasting habits.

Select Attack → Select Targets → Schedule → Review & Phish

Train

Deliver role-based, engaging awareness training tailored to employee responsibilities.

Simulate

Test real-world behaviour using phishing simulations & scenario-based assessments.

Reinforce

Strengthen retention through microlearning, gamification, campaigns and reminders.

Measure

Track engagement, behavioural trends, risk indicators and programme effectiveness.

What This Creates

- ✓ Better recognition of threats
- ✓ Faster reporting of suspicious activity
- ✓ Reduced risky behaviour
- ✓ Improved compliance outcomes
- ✓ Stronger security culture

Security culture improves when learning becomes continuous—not annual.

Built for Enterprise Security Ecosystems

SBCS is engineered to integrate seamlessly into existing enterprise environments & support large-scale deployments.

Integration & Deployment

SAML Single Sign-On (SSO)

Secure authentication using Microsoft Entra ID, Okta, Google Workspace, and other identity providers.

SCIM Provisioning

Automatically synchronise users, roles and groups.

REST APIs

Connect with LMS, HRMS, BI and governance platforms.

LMS Compatibility (SCORM)

Deploy content within existing learning systems.

HRMS Integration

Automate enrolment using employee and organisational data.

Multi-Tenant Architecture

Support subsidiaries, departments and partner deployments.

SaaS or SCORM Delivery

Flexible deployment based on organisational needs.

Compliance Alignment

SBCS supports awareness initiatives aligned with:

- GDPR / UK Data Protection Act
- ISO 27001
- SOC 2
- HIPAA
- PCI DSS
- NIST
- Cyber Essentials

Designed to Support

- Audit readiness
- Operational scalability
- Compliance initiatives
- Continuous human risk reduction
- Executive reporting
- Global deployments

Enterprise-ready by design. Behaviour-driven by purpose. Result-Oriented by nature.
